

Organization Default Settings

Last Modified on 05/07/2024 12:54 pm EDT

Organization Defaults set your preferences for various areas of Jackrabbit. There are several defaults that control how Jackrabbit behaves, e.g., whether or not future enrollments are allowed or the rules for class makeups. Others control how some fields display, e.g., the student age format (month/year or year only).

These settings can be edited from the **Gear icon > Settings > General > Organization Defaults** (left menu). They have been organized into sections according to the areas of Jackrabbit they affect.

Expand to learn about each section of settings.

**Expand/Collapse
All**

Default Email Addresses

[Click here to watch a short \(35 sec\) video tutorial on Default Email Addresses.](#)

Organization Email

Your Organization email is also listed on the My Account page (*Gear icon > Account*). Any changes made to this field will also update the email address on the My Account page.

Default Reply to Email Address

When **Default to this Email Address for the "Email Replies Sent to" Field** is set to **Yes**, the address listed in the *Default Reply To Email Address* field will be the default recipient for email replies. However, a different email address can be selected from the drop-down list in the email composer (User ID, Location, and Organization emails).

When set to No, the email address of the User ID sending the email will be used as the recipient for replies to the email.

Notes:

- *Exceptions:* The Default Reply to Email does not apply in areas of Jackrabbit that have specific fields for designating where email replies are sent (*ePayment Receipt Reply to Email, Staff Portal Reply to Email, Parent Portal Reply to Email, and Text Message Notification Email*).
- A User must have the User Permission *Edit Settings, Logo, and Announcements* (Tools category) in order to assign a Default Reply to Email address.

- The Default Reply to Email field is limited to one email address only. It is not possible to add multiple email addresses here.

Registration Form Defaults

Registration Form Defaults affect both your *Quick Registration* and your *Online Registration* forms.

These fields are pre-filled on Jackrabbit's registration forms. **Note:** Pre-filled fields can be changed on the registration form as needed.

- Enter **City, State, Zip/Postal Code**, and **Area Code** defaults. This is optional and you can skip this step if your organization spans several cities, zips, etc.
- **Allow Portal Access for 2nd Contact** defaults to **Yes**. To restrict access to the Parent Portal to only one contact in the *Family* record, change this to **No**.

Tax Settings

Tax Settings include settings for your Tax ID Label and options for charging taxes on fees and services.

Tax ID Label

Add your organization's tax information to have it included on all receipts and statements issued from Jackrabbit. This information is helpful for your customers who submit receipts for tax purposes and reimbursements.

The **Tax ID Label** is displayed before the tax ID number on the receipts and statements. Select one of the options in the drop-down list for the type of tax number to enter. **Note:** Once a Tax ID Label has been selected, the **Tax ID Number** field becomes a required field.

- In the United States, the tax number is called the **EIN** (Employer Identification Number).
- In Canada, the tax number is called the **BN** (Business Number).
- In Australia, New Zealand, and the UK, the tax number is called the **TIN** (Taxpayer Identification Number).

The tax label information is shown to customers on all of the following: statements, receipts, ePayment receipts, and Parent Portal printed transactions.

Tax Settings for Fees & Services

Jackrabbit allows you to enter a default tax setting for fees and services.

1. Set **Make Sale/Post Fees: Add tax in the 'Post Fees' section** to **Yes** to calculate tax automatically in the *Make Sale/Post Fees* window, *Post Fees* section. The Post Fees section is used to post any type of fee, including non-service fees (goods/products/merchandise).
2. Set **Tax Tuition Fees** to **Yes** only if you tax tuition (class fees).

3. Set **Tax Registration Fees** to **Yes** only if you tax registration fees.
4. Set the **Tax Rate** to the appropriate tax rate percentage (Example: 8.7500).
5. Enter a **name** for taxes in the **Tax Label** field. (Examples: Sales Tax, GST, etc.) This tax label will appear in sections of Jackrabbit where a tax label is generated. (If you don't enter a label, Jackrabbit will use the word *Tax* in areas where a label is generated.)
6. Click **Save Changes**.

The settings above are only for fees and services. To edit tax charged on goods/products you sell using Jackrabbit's POS/Store functionality, go to the **Gear** icon > **Settings** > **General** > **Drop-down Lists** (left menu) > **Item Tax Rates**. See the [Store Set Up](#) section for more information.

Transactions Settings

Transaction Settings determine the defaults for when you are posting fees and recording payments.

Prompt for Balance Payoff	Set to Yes to prompt the Jackrabbit User to ask the family to pay their full account balance when accepting payment with the <i>Save Fee & Pay Now</i> button in the <i>Make Sale/Post Fees</i> window. When <i>Yes</i> is selected the <i>Payment Transaction Entry</i> window will auto-fill the <i>Payment</i> field with the full account balance instead of only the amount of the fee just posted. The User is able to edit the <i>Payment</i> field if <i>Yes</i> is selected in error.
----------------------------------	---

<p>Apply Payments To</p>	<p>This setting determines what order payments are applied to fees as a default when making individual payments (in the <i>Payment Transaction Entry</i> window) or batch ePayments (<i>Process ePayments</i> window). This default can be changed at the time of posting if needed.</p> <p>The selection you make here will affect the <i>Aged Accounts</i> metrics on your <i>Executive Dashboard</i>, customer statements, and other reports on customer account balances. We recommend leaving this set to "Oldest Fees First". In most cases, customers pay fees in the order they were incurred, so the first payment is applied to the first posted fee.</p> <p>Reach out to Support before changing this setting to ensure you understand what effect the change will have.</p> <p>There are three options to set the default for how payments are applied:</p> <ul style="list-style-type: none"> • <i>Newest Fees First</i> - Most recent unpaid fees to oldest unpaid fees on the family's account. • <i>Oldest Fees First (within last 12 months)</i>- Oldest unpaid fees dated within 12 months to most recent unpaid fees. • <i>Oldest Fees First</i> - Oldest unpaid fees on the family's account to most recent unpaid fees. Note: <i>It's recommended you select Oldest Fees First so any past due charges are the first to be cleared from the account.</i>
---------------------------------	---

For any payment, fees that are selected by default according to the *Apply Payments to* setting can be edited by the User in the *Payment Transaction Entry* screen.

Receipt Settings

Receipt Settings (*Gear [icon] > Settings > General > Organization Defaults [left menu]*) allow you to control how your printed and emailed receipts will look.

Changes made to these settings also affect the ePayment receipt settings.

Include Link To Parent Portal

With email receipts that are sent from Jackrabbit, you have the option to include a link to the Parent Portal, which gives your families quick and easy access to their accounts.

Set **Include Link to Parent Portal** to **Yes** to have the link to your portal login page included in the receipt.

Include Itemized Fees

Set **Include Itemized Fees** to **Yes** to have your receipts include an itemized detail of the fees a payment was applied to. When this is set to No, the receipt will only include the payment amount without listing the fees the payment was applied to (see the screenshot above).

Student Settings

There are several Organization Default settings that relate to students.

Student Age Format

This setting allows you to choose how you'd like to display student ages in many areas of Jackrabbit. *Display Year Only* will display the student's age in years only. *Display Year and Month* will display the student's age in years and months.

Custom Grade Levels

Jackrabbit provides a listing of standard grade level fields, however, it is also possible to create custom grade levels. When *Custom Grade Levels* is set to **Yes**, you will be able to define custom grade levels to assign to your students.

To define your custom grade levels, go to the *Gear (icon) > Settings > General > Drop-down Lists (left menu)*. The *Grade Levels* drop-down is located in the *Student* section. You will only see the *Grade Levels* drop-down option if your Student Setting, *Custom Grade Levels* is set to **Yes**.

If you choose not to use custom-grade levels and use the standard grade levels provided by Jackrabbit, you will have the option to change the grade level for several students at once. See [Change Student Grade Levels](#) for more details.

Hide Citizenship

When set to **Yes**, the Citizenship field is hidden on the Student's Summary tab.

Hide Gender

This setting allows you to control if you want to show gender options throughout Jackrabbit. The default setting is **NO**. This means you will **not** hide the gender selection settings. Go to the *Gear (icon) > Settings > General > Drop-Down Lists (left menu) > Student > Gender* to create the drop-down lists for gender.

Set to **YES** if you want to hide all references to gender.

Class Settings

Send Enrollment Email to Instructors

If *Send Enrollment Email to Instructors* is set to **Yes**:

- An email confirmation will automatically be sent to the primary instructor whenever a student enrolls in a class through Online Registration or the Parent Portal.
- When a student is enrolled from within Jackrabbit, you will be prompted with an option to email the instructor. The checkbox defaults to selected but can be cleared for a single instance.

If *Send Enrollment Email to Instructors* is set to **No**:

- No email will be sent to the instructor when a student enrolls through Online Registration or through the Parent Portal.
- You will not see the prompt to email the instructor when enrolling from within Jackrabbit.

For Jackrabbit to send the enrollment email to the instructor, they must be designated as an **Instructor** on the *Summary* tab of their *Staff* record. They must also be assigned as **Instructor 1** on the *Instructors* tab of the *Class* record.

Allow Future Enrollments

This setting determines if enrollments with a future date are allowed. Set *Allow Future Enrollments* to **Yes** to allow for registrations with enroll dates in the future. When *Allow Future Enrollments* is set to **Yes**, a date field choice is available when enrolling. Refer to [Future Enrollment](#) for more details.

Calculate Class Duration

This setting controls whether or not the *Duration* field on the *Class Summary* tab is automatically calculated when the times are entered. Set this to **No** if you want to manually complete that field; for example, set this to 1 and count the class as one unit regardless of the length of the class.

Warn If Enrolling Students Outside of Age Range

Set *Warn if enrolling students outside of age range* to **Yes** to provide a pop-up warning for a Jackrabbit User when a student is enrolled in a class outside the defined Min Age and/or Max Age (*Class* record > *Summary* tab).

Prompt to Update Fixed Fee with Enrollment Changes

When a family or student has a Fixed Fee in place, Jackrabbit can alert you when a change is made to

enrollment so that you can update the Fixed Fee. Set *Prompt to Update Fixed Fee with Enrollment Changes* to Yes to be alerted that the student is enrolled has a student &/or a family Fixed Fee and to have the option to adjust the fees.

Refer to [Fixed Fees \(Tuition\)](#) for more details.

Makeup Settings

When you [track absences](#) in Jackrabbit, you'll have the option of offering your students the ability to make up their missed classes.

These settings control makeups.

	<div>Eligibility for Absences</div> <div>Define how a student's eligibility to make up a class is assessed when an absence is recorded.</div> <div><ul style="list-style-type: none">• Select with Each Absence - for each student's absence recorded, select whether the student is eligible to make up the missed class or not.• Always Allow Makeups - all student absences are automatically marked eligible for makeup.• Never Allow Makeups - absences are never eligible for makeup.</div>
--	---

	<p>Expiration</p> <p>It's a common policy that students must make up a class within a certain time frame (such as 2 months). Save time and effort by setting the eligibility for all makeups to expire automatically after a designated time frame.</p> <p>There are three options for setting expiration dates:</p> <ul style="list-style-type: none"> • No expiration - all makeups are eligible indefinitely, a student can always make up a missed class. • Based on a time limit - set the eligibility for a makeup to expire after a number of days, weeks, or months. The eligibility expires at the end of the last day in the time frame. • Until the last day of the session - a student's eligibility to make up a class expires at the end of the session the absence was recorded in. <p>When the current date is later than the makeup expiration date, eligibility is marked as expired, and a makeup class cannot be scheduled.</p> <p>Before the eligibility has expired, a makeup expiration date can be edited to extend the date to accommodate for special situations, such as an extended illness. Optionally, update the makeup expiration dates for multiple absences during a specified time frame. See the <i>Frequently Asked Questions</i> below.</p>
	<p>Class Makeup Group Size Limit</p> <p>Select the number of extra spots you will allow in a class for makeups. If you don't want makeups to exceed the class maximum number of students set this to zero (0).</p> <ul style="list-style-type: none"> • Example - when the size limit is set to 2, the class max size is 10, and there are 8 currently enrolled students, there will be space for 4 makeup students ($10 + 2 - 8 = 4$).

Frequently Asked Questions

Q. Can I update the makeup expiration dates for multiple absences at once?

A. If your makeup policy is to give students a specific time frame for them to make up their missed

classes, you'll define that in your makeup settings above.

You can change the expiration date for multiple absences at the same time based on the date they occurred.

1. Go to the **Gear icon > Settings > General > Organization Defaults (left menu) > Makeup Settings > Expiration**.
2. Select a longer expiration time period for the makeup classes. You also have the option of selecting *No expiration. They can always make up a missed class*. These settings can be changed and updated at any time.
3. Click **Save Changes** once the *Makeup Settings* are selected and enter the date range for the absences in the pop-up window. *Note:* The system allows you to select a date range within the past 180 days (6 months).
4. Click **Yes, update Makeup Expiration Dates** and you will see a *Success!* message and a list of the number of absences that were updated.

If you are using the **Parent Portal**, and you want to allow parents to schedule makeups themselves, you will need to define your Parent Portal Absence & Makeup Settings, refer to the next section.

Parent Portal Absence & Makeup Settings

When you use the Parent Portal, you can **allow parents to schedule absences through their portals**. This option is available regardless of whether you **track absences or track attendance** in Jackrabbit.

If you track absences, you'll have the option of offering makeups for missed classes. If you do offer makeups, you can also **allow parents to schedule makeups in the Parent Portal**.

There are several settings throughout Jackrabbit that control a parent's ability to schedule absences and makeups in the Parent Portal; **review the various settings**. This section covers the **Parent Portal Absence & Makeup Settings**.

Parent Portal Absence Settings

These settings control how absences are displayed in the Parent Portal on the **Absences (or Attendance)** tab in the student record and on the **Absences & Makeups** page (from the hamburger menu). They define whether or not you will allow parents to record absences in their portals and control when they can be scheduled.

Absences display rules

What Absences Would You Like Your Parents to See?

Select which absences you want to display in the Parent Portal:

- **All absences** - all recorded absences will display.
- **I'd like to limit the past absences**- limit the past absences that display to:
 - **Only absences eligible for makeups**- Only absences that were marked as eligible for a makeup will display.
 - **Only display absences from the last...**- Display only absences that occurred during a specified number of days, weeks, or months.
 - **Display only the last...** - Limit the number of past absences that will display.

These three rules can be used in conjunction with each other.

An absence is displayed for each class a student missed; if several classes were missed on one day, each class counts as an absence.

Allow parents to record absences?

Allow Parents to Record Absences via the Parent Portal

Control whether or not parents can schedule absences for their students through their portals.

When you allow parents to record absences in the Parent Portal, access to an Absences & Makeups page is added to the hamburger menu in their portals. This page summarizes all absences for all students in the family and a button opens a modal for the parent to schedule absences.

	<p>Scheduling Window for Absences</p> <p>If you are allowing your parents to record absences in their portals, do you require advance notice?</p> <ul style="list-style-type: none"> • Can schedule absences today or anytime in the future. <ul style="list-style-type: none"> ◦ No advance notice for absences is required, a parent can schedule an absence on the same day or any day in the future. • Must be scheduled in advance by at least... <ul style="list-style-type: none"> ◦ Set the number of hours, days, weeks, or months of advance notice that you require.
	<p>Receive notification emails when absences are scheduled?</p> <p>When an absence is scheduled in the Parent Portal, Jackrabbit immediately (and always) sends an email notification to:</p> <ul style="list-style-type: none"> • The instructor of the class. If there are multiple instructors, only the first instructor (Instructor 1) will receive the email. • The primary contact in the family record of the student enrolled in the class. • The email address for the Portal Login ID that scheduled the absence. <p>When this field is set to Yes, Jackrabbit will send an additional email notification to the email address you designate advising that an absence has been scheduled.</p>

Parent Portal Makeup Settings

If you offer makeups (when tracking absences), these settings define whether or not your parents can schedule makeups in their portals, outline the rules for which classes will be available for makeup, determine when makeups can be scheduled, and specify if parents can cancel makeups they've scheduled.

These settings are dependent on the selections made in your Makeup Settings; if they are set to "Never Allow Makeups", the settings covered below are hidden.

Allow parents to schedule makeups?

	<p>Allow Parents to Schedule Makeups via the Parent Portal</p> <p>Control whether or not parents can schedule absences for their students through their portals.</p>
	<p>Only Allow Makeups in Classes with at Least One Student Enrolled</p> <p>Set this to yes to avoid a makeup class being booked in a private lesson that has an opening.</p>
Makeup class similarity rules	
	<p>These rules control which classes display when a parent is scheduling a makeup through their Parent Portal.</p> <p>Each rule asks the question, "<i>Does the makeup class have to have the same xxx as the class that my student was absent from?</i>"</p> <p>When these are all set to No, <i>all</i> classes with openings (adjusted for makeups and absences) will display. Setting a rule to Yes will omit classes that do not have the same xxx (Location, Session, etc.) as the class the student missed.</p> <p>If set to Yes, the Category 1, 2, and 3 rules give an additional option to define whether the makeup class must have the same Category value as the class the student was absent from or the class the student is currently enrolled in.</p> <p>This can be useful if students advance through classes quickly, e.g., from one level to another.</p>
Makeup scheduling rules	

Makeup Date Lead Time

Use this scheduling rule to prevent parents from scheduling makeups at the last minute.

- **No lead time needed. Day of makeup scheduling is fine.**

- Parents can schedule a makeup class held on the current date or later.

- **I need at least this much lead time for makeups**

- Makeups can only be scheduled in classes held on or after the set number of hours, days, or weeks from the current date.

Example:

Today is September 1st, and the lead time is set to 2 days

- Parents can schedule makeups in classes held on or after September 3rd.
- Makeups cannot be scheduled in classes held on September 1st or 2nd.

Scheduling Window for Makeups

Do you require that makeups are scheduled within a specified time frame? The scheduling window refers to how far the date of the makeup class is from the current date.

- **Can schedule makeups anytime in the future.**

- Parents can schedule a makeup class held any time after the current date.

- **Must be scheduled within this window**

- Makeups can only be scheduled into classes that are held within a set number of days or weeks from the current date.

Example:

Today is September 1st, and the scheduling window is set to 4 weeks

- Parents can schedule makeups in classes held between September 1st and September 29th (4 wks).
- Makeups cannot be scheduled in classes held on September 30th or later.

	<p>Scheduling Window for Future Absences</p> <p>Use this scheduling rule to prevent parents from scheduling a makeup for an absence that is too far in the future. The scheduling window refers to how far the date of the absence is from the current date.</p> <ul style="list-style-type: none"> • Can schedule makeups anytime in the future. <ul style="list-style-type: none"> ◦ Parents can schedule a makeup for any future absences. • Must be scheduled for absences occurring within this window <ul style="list-style-type: none"> ◦ Makeups can only be scheduled for absences that are within the set number of days, weeks, or months from the current date. <p>Example: Today is September 1st, and the scheduling window is set to 1 month</p> <ul style="list-style-type: none"> ■ Parents can schedule makeups for absences that occur on or before October 1st. ■ Makeups cannot be scheduled for absences that occur on October 2nd or later.
	<p>Can Inactive Students Schedule Makeups?</p> <p>Control whether or not makeups can be scheduled in the Parent Portal for students who are not currently enrolled in classes, i.e., are inactive.</p>
Makeup notifications	
	<p>Receive notification emails when makeups are scheduled?</p> <p>Whenever a makeup is scheduled in the Parent Portal, Jackrabbit will immediately (and always) send an email notification to the class instructor, the primary family contact, and to the address related to the Portal Login ID that scheduled the makeup.</p> <p>Set this field to Yes to send an additional email notification to the email address listed, which advises that a makeup has been scheduled.</p>
Schedule makeup message	

	<p>Message Below Available Class Makeup List</p> <p>This setting allows you to customize the message that appears at the bottom of the available makeup classes window.</p>
Makeup success message	
	<p>Provide a custom message to parents after a makeup is scheduled?</p> <p>Set this to Yes to customize a confirmation that will display to advise the parent they were successful in scheduling their makeup class.</p>
Cancellation rules	
	<p>Can Makeups be Canceled?</p> <p>Control whether or not makeups can be canceled in the Parent Portal.</p>
	<p>Cancellation Window</p> <p>If you are allowing your parents to cancel makeups in their portals, do you require cancellations to be done with advance notice?</p> <ul style="list-style-type: none"> • Can cancel makeups anytime in the future. <ul style="list-style-type: none"> ◦ No advance notice for cancellations is required, a parent can cancel a makeup on the same day, or any day in the future. • Must be canceled before makeup is within this window <ul style="list-style-type: none"> ◦ Set the minimum number of days or weeks in advance that makeups must be canceled.

Time Zone & Date Settings

In the Organization Default Settings, there are several settings for Time Zone and Dates.

1. Go to the **Gear icon > Settings > General > Organization Defaults** (left menu) > **Time & Date Settings**.
2. Select the **Date Format** for your organization. Jackrabbit uses the US standard date format of

mm/dd/yyyy throughout the database, and it is not possible at this time to use another format **inside** the database. You can, however, choose dd/mm/yyyy for external (customer) views such as on the *Online Registration* form: student birth date or on customer statements.

3. Verify your **Time Zone** to ensure that all financial transactions and enrollment records use your area's correct date and time.

Note: Jackrabbit defaults to Eastern Time - US/Canada if this setting is not changed.

4. Verify the dates if you observe daylight savings time and update if needed.
5. **Save Changes.**

Frequently Asked Questions

Q. We use the UK date format of dd/mm for our data. If I decide to import my data, will that be a problem?

A. Jackrabbit uses the US format of mm/dd. We should be able to convert the dates into US format for you. Realize that inside your database, all dates will be presented in US format of mm/dd/yyyy. If we have trouble converting your dates we will let you know.

Costume / Apparel Module Settings

The **Costume/Apparel Module Settings** determine the defaults for the Costume module.

The default for this module is determined by the edition of Jackrabbit you are using. You are able to rename it to any one of the following: Apparel, Costume, Equipment, Materials, Supplies, or Uniform.

[Classes Menu > Costume Management](#)

[Class Record View](#)

[Hide Auto-Size](#)

The *Hide Auto-Size* setting allows you to choose whether to hide the auto-size option in Jackrabbit's *Costume/Apparel* module. Learn more about auto-sizing in the [How to Guide: Costume/Apparel Management](#).

Recital Module Settings

[Preferred Module Name](#)

The default module name is **Recital**. If you prefer a different name, enter it here. This will change the name to your preferred name throughout Jackrabbit, including the *Events* menu > *Recital*.

The *Preferred Recital module name* field has a limit of 20 characters. Examples of preferred names include Production, Showcase, Gala, and Exhibition.

Display Participation on Student and Class Enrollments

This setting controls the display of recital participation columns in the Student record, Class record, Enrollment Detail report, and the Staff Portal.

A student's recital participation is indicated using the checkbox that appears next to their name when adding a class they are enrolled in to a recital.

When set to Yes, a *Recital Participation* column is added to the Student record (*Summary & Classes* tabs), Class record (*Enroll List* tab), and the Enrollment Detail report to allow you to quickly and easily see whether or not students are participating in recitals.

- **Unassigned** - The class has not been added to any recitals.
- **No** - The student's checkbox is not selected (clear) in a recital.
- **Yes** - The student's checkbox is selected (checked) in a recital. A Ticket icon will display next to the student's name on the Staff Portal Attendance page for that class.

After adding or editing settings, it is necessary to log out of Jackrabbit and back in again to see the effect of the setting change.
